EDUCATION

Master of Computer Applications Thapar Institute of Engineering & Technology	2024–2026
Bachelor of Computer Applications Patliputra University, Patna	2020–2023

ACHIEVEMENTS

• 1st Runner-Up (Top 2 of 250+ teams) — NSSC 2025, IIT Kharagpur (Data Analytics)	Dec 2025
• National Finalist (Top 10) — SOLIDWORKS AI Hackathon, IIT Madras (YOLOv8, CV)	Jan 2026
• National Finalist — Serve Smart Hackathon (Jagriti'26), IIT BHU (YOLOv8, OpenCV)	Feb 2026
• National Finalist — HackWise 2026 (IRIS), IIM Indore	Jan 2026

SKILLS

Languages: Python, C/C++, SQL, HTML/CSS.

AI/ML: PyTorch, Scikit-learn, Machine Learning, Deep Learning (CNN, RNN, LSTM, GRU), NLP.

Computer Vision: YOLOv8, OpenCV.

Web & Backend: Flask, Streamlit, REST APIs.

Data & Visualization: Pandas, NumPy, MySQL, Matplotlib, Seaborn.

MLOps: Docker, MLflow, DVC.

Tools & Cloud: Git, GitHub, Jupyter, Google Colab, VS Code, Hugging Face Spaces, Gradio, AWS.

Soft Skills: Analytical thinking, problem solving, teamwork, leadership, communication.

PROJECTS

HPCL Intelligent Cost Database |  [GitHub](#) Jan 2026

- Built a full-stack AI-powered procurement intelligence platform using React, Flask, Sentence Transformers, and REST APIs for automated item standardization and cost analytics.
- Engineered NLP pipelines for canonical item mapping, achieving a 94.4% average confidence score, and built statistical models to flag critical cost outliers for supplier negotiation.

S.E.N.T.I.N.E.L. – (Serve Smart Hackathon, IIT BHU) |  [GitHub](#) |  [Live Demo](#) Feb 2026

- Engineered a YOLOv8-Medium detection pipeline for drone and satellite aerial-reconnaissance imagery at 1024px resolution, applying dataset hygiene (class pruning) and a custom cyclic checkpointing ("relay") training strategy with scheduled learning-rate resets to reach 0.715 mAP@50, while keeping the deployed model under 50MB for fast CPU inference.
- Designed an automated scale-calibration engine converting detected object dimensions into real-world measurements, and built a real-time OpenCV dashboard with Test-Time Augmentation for live heads-up visualization overlays, deployed on Hugging Face Spaces.

LHC Jet Particle Analysis |  [GitHub](#) |  [Live Demo](#) Dec 2025

- Built a multimodal ML pipeline for the HLS4ML dataset, securing **1st Runner-Up at NSSC 2025, IIT Kharagpur**.
- Fine-tuned ResNet-18 for jet image classification (0.82 F1-Score) and deployed a CNN Autoencoder trained exclusively on normal data to flag anomalies via Hugging Face.

CERTIFICATIONS

- [PyTorch for Deep Learning Bootcamp](#) — Udemy (2025)
- [Introduction to Applied Data Science with Python](#) — Simplilearn SkillUp (2025)
